Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

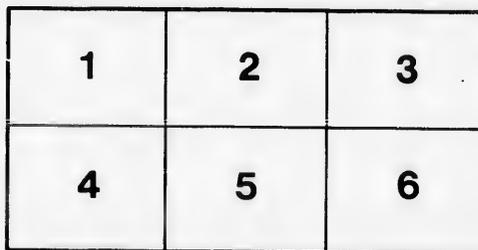

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Handwritten text in a cursive script, likely a page from a manuscript or ledger. The text is oriented vertically along the right edge of the page. It appears to be a list or account, with entries separated by horizontal lines. The script is dense and difficult to decipher due to its cursive nature and the image's orientation.

# SYNOPSIS, &c.

---

## MINERALS.

---

The Minerals are chiefly contained in six glass cases. The duplicate specimens are deposited in the drawers. In this Synopsis the name of the Mineral is first given, then its locality, and lastly the source whence it was received, and sometimes remarks thereon.

The arrangement is according to the system of Professor Cleaveland, except in some of the specimens of different species.

*N. B. denotes New Brunswick; N. S. Nova Scotia; U. S. United States.*

977. Oxide of Tin. Cornwall.  
 978. Tin Ore. Cornwall.  
 979. Oxide of Tin. Do.  
 980. Crystallized Tin.  
 981. Oxide of Tin.  
 982. Tin Ore. Pokiok, New-Brunswick.

## GENUS XI.

86. Sulphuret of Zinc. Lubec Lead Mine.  
 87. Do. Do. Do. Do.  
 88. Blende. Hallowell, Flintshire, England.  
 89. Silicious Oxide of Zinc. Cornwall.  
 90. Arborescent Carbonate of Zinc. Cornwall.  
 91. Calamine. Derbyshire.  
 92. Black Blende or Sulphuret of Zinc. Cornwall.  
 93. Sulphuret of Zinc. Derbyshire.  
 94. Red Zinc Ore, with Franklinite. New Jersey. Prof. Shepard.  
 95. Red Oxide of Zinc. Cornwall.

## GENUS XIV.

96. Crystallized Manganese Ore. Tatagouche River. Bathurst.  
 97. Grey Oxide of Manganese. England.  
 98. Grey Oxide of Manganese. Petite, N. S.  
 99. Do. Do. Tatagouche, Bathurst, N. B.  
 100. Black Oxide of Manganese. Quaco, N. B.  
 101. Do. Do. Do. Bennington, U. S.  
 102. Manganese, with Quartz. Tatagouche, Bathurst.  
 103. Black Oxide of Manganese. Bennington, United States.

## GENUS XVII.

104. Sulphuret of Antimony.  
 105. Bismuth.  
 106. Bismuth. Connecticut.  
 107. Chrome. Island of Cuba.  
 108. Chrome Ore. Professor Forman.  
 109. Do. Do. Do. Do.  
 110. Feroxide of Chrome. Professor Forman.

## GENUS XX.

111. Molybdena.  
 112. Do. Chester, United States.  
 113. Sulphuret Molybdena. St. Stephens, N. B.

## VOLCANIC PRODUCTIONS.

114. Lava, containing Hauyn. Etna.  
 115. Sulphur, with Sulphate of Strontian. Vesuvius.

ROCKS.—*Foreign and Provincial.*

1160.	Granite.	Jones' Mill, River Saint John, New Brunswick.	208
1161.	Do.	Meductic, New Brunswick.	209
1162.	Red Feldspar Granite.	Pokiok, New Brunswick.	210
1163.	Do.	do. Palfry Mountains.	211
1164.	Do.	do. Nerepis, New Brunswick.	212
1165.	Granite.	North West Arm, Halifax, Nova Scotia.	213
1166.	Do.	Near Boston, United States. Used for millstones.	214
1167.	Do.	Near Baltimore, United States.	215
1168.	Do.	Pokiok, New Brunswick.	216
1169.	Do.	Meductic, New Brunswick.	217
1170.	Sienite.	Northward of Quaco, New Brunswick.	218
1171.	Do.	Loch Lomond Road, New Brunswick.	219
1172.	Do.	Near Saint John, New Brunswick.	220
1173.	Do.	Hammond River, New Brunswick.	221
1174.	Micaceous Rock.	North West Arm, Halifax, Nova Scotia.	222
1175.	Mica Slate.	Near Baltimore, United States.	223
1176.	Porphyry Granite.	Near Baltimore, United States.	224
1177.	Gneiss.	Susquehannah, United States.	225
1178.	Gneiss Rock.	North West Arm, Halifax, Nova Scotia.	226
1179.	Diallage Rock.	Cobequid Mountains, Nova Scotia.	227
1180.	Sienite.	Warwig, Charlotte County, New Brunswick.	228
1181.	Sienite.	Sienitic Ridge, New Brunswick.	229
1182.	Gneiss.	Nova Scotia.	230
1183.	Graphic Granite.	Near Baltimore, United States.	231
1184.	Sienite.	Nerepis Hills, New Brunswick.	232
1185.	Granite, containing Schorl and Albite.	Chester, Mass., U. S.	233
1186.	Red Sienite.	Magaguadavic, New Brunswick.	234
1187.	Granite, from Pompey's Pillar.		235
1188.	Mica Slate.	Meductic, New Brunswick.	236
1189.	Do. do.	drift. Saint John, New Brunswick.	237
1190.	Gneiss.	Near Baltimore, United States.	238
1191.	Sienite.	Digdeguash, New Brunswick.	239
1192.	Hornblende Rock.	Bull Moose Hill, New Brunswick.	240
1193.	Sienite.	Musquash Lakes, New Brunswick.	241
1194.	Granite.	Cheputnecticook Lakes, New Brunswick.	242
1195.	Sienite.	Nictau, Nova Scotia.	243
1196.	Sienite.	Warwig, Charlotte County, New Brunswick.	244
1197.	Granite.	Bathurst, New Brunswick.	245
1198.	Red Feldspar Sienite.	Charlotte County, New Brunswick.	246
1199.	Red Trap.	Cape Chignecto, Nova Scotia.	247
1200.	Trap Rock.	Cape Chignecto, Nova Scotia.	248
1201.	Hornblende Rock.	Isle Haut, Nova Scotia.	249
1202.	Trap.	Cape Chignecto, Nova Scotia.	250
1203.	Red Trap.	Charlotte County, New Brunswick.	251
1204.	Porphyry.	Campo Bello, New Brunswick.	252
1205.	Clay Porphyry.	Sweden. (From Mohs' Collection.)	253
1206.	Porphyry.	Near Loch Lomond, New Brunswick.	254
1207.	Greenstone Trap.	Isle Haut, Nova Scotia.	255
